 5. What is V and V model? Explain. Mention the Advantages and Disadvantages.
- White box testing/unit Testing
 1. What is Unit testing? Explain the different types.
- Black Box testing
 1. What is black box testing? Mention the different type.
 2. What is functional testing/component testing? Explain with example.
 3. What is smoke testing? Explain with example.
 4. What is integration testing? Mention the different type.
 5. What is regression testing? Explain with example.
 6. What is performance testing? Mention the types Explain with example.
 7. What is Compatibility testing? Explain with example.
 8. What is Globalization testing? Mention the types Explain with example.
 9. What is Ad-hoc testing? Explain with example.
 10. What are different level of testing?
 - (i) Unit/component/program/module testing
 - (ii) Integration testing
 - (iii) System testing
 - (iv) Acceptance testing
 11. What is verification and validation in software testing?
 - (i) Verification: it is a static analysis technique. Here testing is done without executing the code. Example includes – Reviews, inspections, and walkthrough.

(ii) Validation: it is a Dynamic analysis technique. Here testing is done with executing the code. Example includes Functional and non-functional techniques.

➤ Non-functional testing

1. What is Non -functional testing? Mention its type.
2. What is difference between Functional and non- functional testing?

➤ Test Plan

1. what is test plan? Why we do we use test plan?
2. Is test plan is necessary to create? explain.

➤ Test case

1. What is test case document?
2. Practices to write good test cases.
3. Why do we write test case?
4. What is test scenario?
5. How to write test scenarios?
6. What is RMT?
7. How to prepare RMT documents? and its advantages.
